How to read this report

SOURCES

Prices and returns from Yahoo Finance. Financials, insider trades and filings from SEC EDGAR (US-listed companies only). Contract awards from USAspending.gov (US federal prime awards only). Results dates from the Nasdaq calendar and company announcements.

DEFINITIONS

Cash runway is cash and short-term investments divided by the last 12 months of free cash outflow; it ignores credit lines and future fundraising. Insider trades count open-market purchases and sales only. Share count change compares shares outstanding with a year earlier. Year-to-date returns run from the previous year's last close; SpaceX listed in June 2026 and is measured against its $135 IPO price.

IMPORTANT

This report is information, not investment advice, and it does not recommend any security. Figures can change quickly and may contain errors; check the original filing before acting. Capital is at risk.

KEEP IT CURRENT

This report is rebuilt every week. Live prices, charts, filings and news for every company are at orbitalpha.cloud/space-stocks, and the free Sunday newsletter covers what moved and why.
